SUMMARY

I am a passionate and results-driven full-stack developer with hands-on experience in building scalable web and mobile applications using React.js, React Native, Next.js, Node.js, and Django. I specialize in crafting responsive UIs, integrating RESTful APIs, and delivering high-quality code. Adept at full project lifecycle development and collaborative teamwork in agile environments.

EDUCATION

Maulana Azad National Urdu University B.Tech in Computer Science & Information Technology CGPA: 8.97	Hyderabad, Telangana Sep 2021 – April 2025
---	---

Al-Irfan Residential School Intermediate (PCM) Percentage: 85%	Aurangabad, Maharashtra May 2019 – July 2021
---	---

EXPERIENCE

Alt-Switch Software Services Software Engineer	Hyderabad Jan 2026 – Present
---	--------------------------------

- Developed a warehouse, inventory, and e-commerce management system for ICS UK LTD using Angular, NestJS, and PostgreSQL, improving operational efficiency and inventory tracking.
- Built the **CaterChoice e-commerce platform**, including a web application using Next.js and a mobile app using React Native.
- Designed and developed **warehouse management mobile applications** using React Native for real-time inventory and logistics handling.
- Implemented a **Point of Sale (POS) system** using Electron for desktop-based retail operations.
- Collaborated with cross-functional teams to deliver scalable, high-performance solutions across web, mobile, and desktop platforms.

Mithilastack Full Stack Developer	Darbhanga, Bihar June 2025 – Jan 2026
--	---

- E-commerce Platform – Maithili Books**

Developed a full-stack e-commerce web application using Next.js, Node.js, Express.js, and MongoDB.

- Features: Book listings, user authentication, cart, and order management
- Live: gyanchangera.in | Admin: admin.gyanchangera.in

- ERP Web & Mobile Application – Spirit HRMS**

Built a feature-rich ERP system using React.js, Node.js, Express.js, and MongoDB.

- Key Modules:**
 - Attendance with live location
 - Leave & employee management
 - Salary, expense & invoice tracking
 - Internal/client project management with Gantt view

- Office/holiday management and activity logs
 - Live: spirit-hrms.mithilastack.com
- **Turant Logistics Web & Mobile Application | React Native, Next.js, Node.js (Microservices), RabbitMQ, Socket.io, Firebase, Cashfree**
 - Developed a complete logistics system including consumer app, rider app, and admin dashboard.
 - Built mobile apps using React Native and web/admin panel using Next.js, with backend powered by Node.js (microservice architecture).
 - Implemented real-time ride tracking and request handling via Socket.io and queue management using RabbitMQ.
 - Integrated Cashfree for payments and Firebase for push notifications.
 - Rider App: [Play Store Link](#) | Consumer App: [Play Store Link](#)
(https://play.google.com/store/apps/details?id=com.turantlogistics_rahman)
- **VertEV – EV Rental Platform (Web + Mobile App) | React Native, Next.js, Node.js Firebase**
 - Developed a **full-stack EV rental platform** including admin dashboard (Next.js) and consumer mobile app (React Native).
 - Built a **scalable backend** using Node.js, Express.js, and MongoDB to handle users, vehicles, rentals, and payments.
 - Designed and implemented an **admin dashboard** to manage vehicles, hubs, batteries, rentals, users, payments, maintenance, and system logs.
 - Developed a **consumer mobile application** with KYC verification, vehicle booking requests, and rental lifecycle management.
 - Implemented **role-based workflows** where admins verify bookings and assign vehicles to users.
 - Integrated **payment gateway (Juspay with HDFC merchant)** for secure transaction processing.
 - Built **automated cron jobs** to handle daily rental deductions at scheduled intervals.
 - Implemented **real-time notifications system** for booking updates, approvals, and rental activities.
 - Optimized application performance and ensured smooth API communication between web, mobile, and backend systems.
 - Deployed and maintained production applications:
 - Web: <https://vertev.in/>
 - Admin: <https://admin.vertev.in/>
 - App: <https://play.google.com/store/apps/details?id=com.vertev>

Slikk.Ai | Full Stack Developer Intern

Hyderabad, Telangana | Sep 2024 – May 2025

- Implemented "Files", "Task", and "Invite People" features in Slikk V2 (testweb.slikk.ai); contributed to "Persona" and "Gantt View" in Slikk V1 (webapp.slikk.ai).
- Developed complete frontend and integrated APIs for Kaam365 dashboard (webapp.kaam365.ai) using React.js.
- Enhanced performance and user experience of Kaam365 mobile app using React Native here is url [kaam365](https://kaam365.com).

Intment Technologies (P) Ltd | Web Developer Intern

Hyderabad | July 2024 – Aug 2024

- Built frontend and integrated APIs for EliteSuperStar (elitesuperstar.net) using React.js.

- Designed responsive UI for Let'sRead (lets-read-new.vercel.app) using Tailwind CSS to improve UX.
- Developed **BharatiyaCare**, a pharmacy platform with subscription features, using React.js and Tailwind CSS for the web frontend, Node.js, Express.js, and MongoDB for the backend, and React Native for the mobile app — [Website](#) | [App](#).

MeitY Project MANUU | Web Developer Intern

Hyderabad | Mar 2024 – June 2024

- Updated and organized course content for over 100+ courses in the www.edeekshaam.in dashboard, improving data accuracy and accessibility..
- Created three engaging educational games to support interactive learning.

MeitY Project MANUU | Web Developer Intern

Hyderabad | March 2023 – Dec 2023

- Built and improved student dashboard and games (e.g., brushing teeth, color matching, push-pull) for edeekshaam.in.
- Used Git for collaborative code management and version control.
- Developed pages of www.edeekshaam.in.

SKILLS

Languages: JavaScript, Python, Java, C

Frameworks/Libraries: React.js, React Native, Next.js, Node.js, Express.js, Django, PHP, Tailwind CSS, Bootstrap, TypeScript, jQuery, MUI, EJS

Databases: MongoDB, MySQL

Tools/Platforms: Git, GitHub, AWS, Vercel, Netlify, VS Code, Figma, Canva

PROJECTS

NextGenEdu: e-learning platform | GitHub

MERN Stack

- Built a full-stack e-learning platform to support interactive and personalized learning.
- Integrated JWT auth, Redux for state management, and SCSS/Bootstrap for styling.
- Deployed backend on AWS EC2, used SMTP for mail and Multer for image upload.

FarmOnHand: E-commerce for farmers | GitHub

MERN Stack

- Created a functional e-commerce platform for farmers with cart and Stripe checkout.
- Used MongoDB Atlas for database, JWT auth, Multer, and AWS EC2 for deployment.

TripSmart - Smart Tourism App | GitHub

React Native, MongoDB, Express

- Developed a mobile app to help tourists find destinations, plan trips, and navigate efficiently.
- Implemented real-time features and map integration using location APIs.

OPEN SOURCE PROJECTS

MongoDB Models Visualizer | GitHub

MERN Stack

- Developed an NPM package to **automatically visualize MongoDB/Mongoose schema relationships** for better database architecture understanding.
- Generates **visual diagrams of models and their relationships**, helping developers analyze complex schemas.
- Designed to integrate easily into **Node.js and Express applications** for quick schema visualization.
- Published as an **open-source package on NPM** for community use.
- <https://www.npmjs.com/package/mongodb-models-visualizer>
